1. Before You Start

Package Contents
- TEG-PCITXR/TEG-PCITXRL
- CD-ROM (Driver)
- Multi-Language Quick Installation Guide

System Requirements

- 32-bit PCI 2.1 slot
- CD-ROM Drive
- CPU: 1GHz or above (Windows 7) / 800MHz or above (Windows Vista) / 300Mhz or above (Windows XP/2000/ME/98)
- Memory: 1GB RAM or above (Windows 7) / 512MB RAM or above (Windows Vista) / 256MB RAM or above (Windows XP/2000/ME/98)
- Windows 7(32/64-bit) / Vista(32/64-bit) / XP(32/64-bit) / 2000/ME/98
- A RJ-45 Ethernet cable
2. How to Install

**Note:**

1. For Windows 98SE and Me driver installation, refer to the user guide on the Driver CD-ROM.
2. Do not insert the TEG-PCITXR/TEG-PCITXRL until instructed to do so.

1. Insert the **Driver CD-ROM** into your computer’s CD-ROM Drive (Windows Vista/XP/2000).

2. Click **Run autorun.exe** (Windows Vista only)

3. Click **Install Driver** (Windows Vista/XP/2000).

4. Follow the **InstallShield Wizard** instructions (Windows Vista/XP/2000).

5. Click **Yes** (Windows 2000 only)

7. **Shutdown** your computer and then open your computer's Case.

8. Insert PCI Card firmly into an available PCI slot, and then turn **ON** the computer and wait until the Windows desktop appears.

9. Drivers will install automatically.

10. Click **Yes** (Windows 2000 only).
11. Connect a RJ-45 network cable from the computer to an available Ethernet port on your router or switch.

Your Installation is complete

Thank you for choosing TRENDnet
1. I inserted the Driver CD-ROM into my computer's CD-ROM drive and the installation menu does not appear automatically. What should I do?

   1. For Windows Vista, if the installation menu does not appear automatically, click Start, click the Start Search box, and type D:\autorun.exe where "D" in "D:\autorun.exe" is the letter assigned to your CD-ROM Drive, and then press the ENTER key on your keyboard.
   2. For Windows 2000/XP, if the installation menu does not appear automatically, click Start, click Run, and type D:\autorun where "D" in "D:\autorun.exe" is the letter assigned to your CD-ROM Drive, and then press the ENTER key on your keyboard.

2. Windows doesn't recognize my new hardware. What should I do?

   1. Verify that your computer meets the system requirements as specified in Section 1.
   2. Access your device manager to make sure the adapter is installed properly. If you see a networking device with a yellow question mark or exclamation point, you will need to reinstall the device and/or the drivers. To access the device manager on Windows 2000/XP, right-click My Computer, click Properties, click the Hardware tab, and then click Device Manager. To access the device manager on Windows 7/Vista, right-click Computer, click Properties and then click Device Manager.
   3. If the device manager fails to recognize the presence of a new networking adapter, verify that the network adapter is firmly seated in the PCI slot.
   4. Plug the adapter into another PCI slot on your computer.

3. Windows recognizes my new hardware, but I'm unable to connect to my network. What should I do?

   1. Verify that the RJ-45 Ethernet Cable is securely connected from your switch or router to your network adapter.
   2. Verify that the LEDs on your network card are lit.
      Verify that the TCP/IP settings are set to Obtain an IP address automatically (see the steps below).

Windows 7

1. Go into the Control Panel, click Network and Internet, click Network and Sharing Center, click Change Adapter Settings and then right-click the Local Area Connection icon and then click Properties.
Windows Vista

1. Go into the **Control Panel**, click **Network and Internet**, click **Network and Sharing Center**, click **Manage Network Connections** and then right-click the **Local Area Connection** icon and then click **Properties**.

2. Click **Internet Protocol Version 4(TCP/IPv4)** and then click **Properties**. Then click on **Obtain an IP address automatically**.

Windows XP/2000/2003Server

1. Go into the **Control Panel**, double-click the **Network Connections** icon and then right-click the **Local Area Connection** icon and then click **Properties**.

2. Click **Internet Protocol (TCP/IP)** and then click **Properties**. Then click on **Obtain an IP address automatically**.
4. How do I install the drivers on Windows 98 or ME?
   Please refer to the User's Guide included on the Driver CD-ROM.

5. Why am I only getting a network connection speed of 100Mbps instead of 1000Mbps?
   1. Check the Ethernet Cable. Make sure you are using CAT-5e or CAT-6 Ethernet Cables. Some CAT-5 cables are not rated to run in Gigabit.
   2. Make sure you are connected to a 1000Mbps switch.

If you still encounter problems or have any questions regarding the TEG-PCITXR/TEG-PCITXRL, please refer to the User's Guide included on the Driver CD-ROM or contact Trendnet's Technical Support Department.
Certifications
This equipment has been tested and found to comply with FCC and CE Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received. Including interference that may cause undesired operation.

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER’S AUTHORITY TO OPERATE THE EQUIPMENT.

Waste electrical and electronic products must not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or Retailer for recycling advice.

ADVERTENCIA
En todos nuestros equipos se mencionan claramente las características del adaptador de alimentación necesario para su funcionamiento. El uso de un adaptador distinto al mencionado puede producir daños físicos y/o daños al equipo conectado. El adaptador de alimentación debe operar con voltaje y frecuencia de la energía electrica domiciliaria existente en el pais o zona de instalación.
