TRENDnet’s TI-G62 is a reliable IP30 unmanaged DIN-rail switch with hardened components rated for extreme industrial environments. It offers 5 Gigabit Ethernet ports, one shared SFP slot, one dedicated SFP slot, and a 12 Gbps switching capacity. DIP switches toggle between the shared Gigabit port and SFP slot and set supported throughput to either 100 Mbps or 1 Gbps. Dual redundant power inputs (power supply sold separately: TI-M6024) and a power failure alarm output trigger support zero downtime applications.
